

RAISING CURIOUS KIDS IN AN AI WORLD

Artificial Intelligence (AI) is expanding rapidly—from YouTube Kids recommendations, voice assistants, and emerging educational tools. It's no surprise if parents feel like it's hard to keep up. Even if it's not yet a big part of your child's daily life, it soon will be. As parents, it can feel daunting to know how (or when) to engage. The good news? You don't need to be the expert. You just need to be the guide.

This session will help you feel confident exploring AI safely with your child, setting clear boundaries, and turning technology into an opportunity for connection and curiosity.

What you'll learn:

- How AI is showing up in kids' worlds and what it can (and can't) do
- Simple ways to explore safely together: shared, short, safe
- Fun family activities paired with clear guardrails
- Parent-friendly tools you can trust, plus a take-home checklist

Presented by Erin Lindheim

Founder of BeAIWise, Erin helps families, individuals, and organizations navigate the changing world of AI with confidence and curiosity. She lives in San Anselmo, has kids at Hidden Valley and Archie Williams, and brings more than 30 years of experience in the technology field.

WHEN: WEDNESDAY, JANUARY 21, 2026 · 6:30PM
WHERE: BROOKSIDE ELEMENTARY SCHOOL
